

Courses offered by UWED

UWED Political Science Courses

2nd Year, 2nd Semester

| Course Name | Description |
|-------------------------------|--|
| Cross-cultural communications | The course aims to equip students with the skills to navigate cultural differences in political contexts, fostering more effective global communication and understanding. |
| Political management | Students will gain insight into the tools and techniques used to shape political agendas, influence public opinion, and implement policies effectively. This course prepares students to engage in political campaigns, advocacy, and governmental roles, combining theory with hands-on experience in political strategy and management. |
| World economy | The course offers students an in-depth analysis of the global economic system, focusing on international trade, financial markets, economic development, and the roles of key institutions like the IMF and World Bank. The course examines key economic theories and real-world examples, helping students understand the interconnectedness of economies and the challenges of managing economic growth and stability on a global scale. |

3rd Year, 1st Semester

| Course Name | Description |
|--|---|
| Analysis of geostrategic risks | The course explores geopolitical threats, security challenges, and strategic risk assessment in international relations. |
| Domestic politics and foreign policy | The course examines the interplay between a country's internal political landscape and its foreign policy decisions. |
| Conflict resolution (conflict studies) | The course focuses on the causes, dynamics, and resolution strategies of political and social conflicts. |
| Political analysis and forecasting | This course introduces methods and tools for analyzing political trends and predicting outcomes. Students will learn to apply both quantitative and qualitative techniques to |

| | |
|--|--|
| | assess political behavior and policy decisions. |
| AI in Politics | This course explores the role of artificial intelligence in political processes, including data analysis, campaign strategies, and policy design. It also covers ethical issues and future implications of AI in governance. |
| Advanced theories of IR | This course covers advanced IR theories like realism, liberalism, and constructivism. Students will critically analyze these theories in relation to global issues such as diplomacy, conflict, and governance. |
| Contemporary International Affairs, World Economy and Uzbekistan Interests | The course analyzes global political and economic trends with a focus on Uzbekistan's strategic priorities. |

3rd Year, 2nd Semester

| Course Name | Description |
|----------------------------------|---|
| Comparative political systems | This course examines the structural and functional differences among various political systems worldwide, highlighting the dynamics of democratic, authoritarian, and hybrid regimes. Students will analyze how institutional frameworks influence policy-making, political stability, and citizen participation across different contexts. |
| Public civil service | This course delves into the roles, functions, and responsibilities of the public administration system and its civil servants. It emphasizes the principles of bureaucratic governance, public accountability, and the practical challenges of implementing effective public policies. |
| Digital technologies in politics | This course explores how digital technologies impact political campaigns, policy-making, and governance. Students will analyze the role of social media, data analytics, and digital communication tools in shaping modern political landscapes. |
| Public relations in politics | This course focuses on the strategies and techniques used in political public relations. Students will learn how to manage political messaging, media relations, and public opinion to influence policy and election outcomes. |
| Soft power diplomacy | This course investigates the concept of soft power and its strategic use in contemporary international relations. Through case studies and theoretical frameworks, students will evaluate how cultural |

| | |
|--|---|
| | influence, media, and institutional diplomacy can be harnessed to achieve foreign policy objectives. |
| Contemporary International Affairs, World Economy and Uzbekistan Interests | This course provides a comprehensive analysis of current global political and economic trends, with a particular focus on their implications for Uzbekistan. Students will examine how international policies, trade dynamics, and geopolitical shifts affect Uzbekistan's strategic interests and its role in the world economy. |

4th Year, 1st Semester

| Course Name | Short Description |
|--|---|
| Techniques of political negotiations | This course examines strategies and methods used in political negotiations. Students will explore negotiation theories and practical techniques to resolve political conflicts and achieve diplomatic goals. |
| Islam and politics | This course investigates the relationship between Islam and political systems. Students will analyze how Islamic principles influence political ideologies, governance, and international relations. |
| System Analysis of Political Processes | This course focuses on analyzing political systems and processes using systematic approaches. Students will learn to assess political structures, decision-making, and the interactions between various political actors. |
| Diplomatic and consular service | This course covers the roles and functions of diplomats and consular officials in international relations. Students will gain insights into diplomacy, consular services, and the management of bilateral and multilateral relations. |
| American History | This course provides an overview of key events and movements in American history. Students will explore the development of the U.S., focusing on political, social, and cultural transformations. |
| Basics of the US political system | This course introduces the structure and functioning of the U.S. political system. Students will examine the roles of the executive, legislative, and judicial branches, as well as political parties and electoral processes. |
| Strategic culture | This course examines the concepts of strategic and political culture, focusing on how historical narratives and societal |

| | |
|--|--|
| | values influence national identity and policy. Students will engage in comparative analyses to understand how cultural factors shape political behavior and decision-making. |
| Political culture | This course explores the role of political culture in shaping political behavior and institutions. Students will examine how values, beliefs, and traditions influence political systems and public participation. |
| Analysis of complex situations in world politics | This course focuses on analyzing complex global political issues, including conflict, diplomacy, and international cooperation. Students will apply theoretical frameworks to understand and resolve political challenges. |
| Political parties and the electoral process | This course studies the structure and function of political parties and their role in elections. Students will learn about electoral systems, campaigning, voting behavior, and the impact of political parties on democracy. |
| Political economy | This course examines the relationship between politics and economics on both a national and global scale. Students will explore how political decisions shape economic policies and how economic factors influence political outcomes. |
| Political anthropology | This course explores the intersection of politics and anthropology, focusing on how cultural practices and social structures affect political behavior. Students will analyze political systems through an anthropological lens, studying power dynamics and governance. |

UWED International Relations Courses

2nd Year, 2nd Semester

| Course Name | Description |
|-------------------------------|---|
| Cross-cultural communications | This course explores communication strategies in international and multicultural contexts. Students will learn how cultural differences influence diplomacy, negotiations, and global interactions. |
| Geopolitics | This course examines the influence of geography on global politics. Students will analyze how physical, economic, and political landscapes shape international power dynamics and conflicts. |
| World economy | This course covers the global economic system, focusing on international trade, finance, and development. Students will explore how countries interact in the global market and the impact of global economic policies. |

3rd Year, 1st Semester

| Course Name | Description |
|--|--|
| Analysis of geostrategic risks | This course examines the methods used to assess risks in global politics, focusing on geopolitical conflicts and their impact on international security. |
| Domestic politics and foreign policy | This course explores the relationship between a country's internal politics and its external diplomatic strategies. |
| Conflict resolution (conflict studies) | This course covers the theories and practices of resolving political conflicts, focusing on negotiation and peacebuilding methods. |
| The European Union in modern international relations | This course analyzes the EU's role in global politics, exploring its influence on international governance, diplomacy, and economic policies. |
| AI in Politics | This course looks at the use of artificial intelligence in political processes, including elections, policymaking, and data analysis. |
| Advanced theories of IR | This course delves into complex International Relations theories, offering deeper insights into global power structures and diplomatic dynamics. |
| Contemporary International Affairs, World Economy and Uzbekistan Interests | This course examines current global issues, focusing on how Uzbekistan's interests intersect with international relations and the global economy. |

3rd Year, 2nd Semester

| Course Name | Description |
|--|--|
| International Organizations | This course explores the role of international organizations like the UN, NATO, and WTO in global governance and conflict resolution. |
| Political management | This course focuses on the strategies and tools used to manage political campaigns, public opinion, and political organizations. |
| "Soft power" diplomacy | This course examines the concept of "soft power" in diplomacy, exploring how cultural influence and non-coercive methods shape international relations. |
| International Security Studies | This course studies global security issues, including conflict, terrorism, arms control, and international peacekeeping efforts. |
| Digital diplomacy | This course explores the use of digital tools and social media in diplomatic practice, focusing on how technology shapes international communication and policy. |
| Contemporary International Affairs, World Economy and Uzbekistan Interests | This course analyzes global political and economic issues with a focus on Uzbekistan's role and interests in international relations. |

4th Year, 1st Semester

| Course Name | Short Description |
|---|---|
| Techniques of political negotiations | This course covers negotiation strategies and methods used in political and diplomatic settings to resolve conflicts and achieve objectives. |
| The Islamic Factor in World Politics | This course explores how Islamic principles and movements influence global politics, particularly in the Middle East and international relations. |
| Transnational corporations in international relations | This course examines the role of multinational corporations in shaping global political and economic dynamics. |
| Strategic culture | This course looks at the impact of culture on strategic decision-making in international relations, focusing on national security and diplomacy. |
| US foreign policy | This course analyzes the key principles, objectives, and strategies of U.S. foreign policy in global politics. |

| | |
|--|--|
| Foundation of the US political system | This course provides an overview of the U.S. political system, covering its structure, key institutions, and political processes. |
| Analysis of complex situations in world politics | This course teaches methods for analyzing multifaceted global political situations and understanding international crises and conflicts. |
| Diplomatic and consular service | This course covers the roles and responsibilities of diplomats and consular officials in managing international relations and serving citizens abroad. |
| Political economy | This course explores the relationship between politics and economics, analyzing how political decisions impact economic policies and vice versa. |
| Energy geopolitics | This course studies the role of energy resources in global politics, focusing on energy security, international energy markets, and geopolitical conflicts. |
| Strategic Thinking and Interaction | This course emphasizes strategic decision-making in global politics, exploring how states and non-state actors interact to achieve their objectives. |
| System Analysis of Political Processes | This course examines political processes using systematic approaches to assess decision-making, power structures, and interactions between political actors. |

UWED International Law

2nd Year Students (2nd Semester)

| Course | Description |
|--------------------|---|
| Administrative Law | This course introduces fundamental principles of administrative law and its application in public governance. It provides students with a comprehensive understanding of regulatory frameworks and the role of administrative agencies. |
| Civil Law | Building upon foundational civil law principles, this course delves into advanced topics such as contractual obligations and property rights. It enhances analytical skills in interpreting complex civil legal matters. |
| Criminal Law | This course offers an in-depth exploration of advanced criminal law concepts, focusing on the analysis of criminal behavior and legal procedures. It examines offenses, defenses, and the intricacies of the criminal justice system. |

3rd Year Students (1st Semester)

| Course | Description |
|---------------------------|--|
| Business Law | This course provides a comprehensive overview of legal issues encountered in the business environment. It examines regulatory frameworks, commercial transactions, and corporate governance that shape modern commerce. |
| Criminal Procedural Law | Focusing on the procedural aspects of criminal justice, this course details processes from investigation to trial. It emphasizes defendants' legal rights and the procedural safeguards necessary for fair trials. |
| Public International Law | This course explores fundamental principles and practices governing relations between states and international organizations. It examines treaties, diplomatic relations, and the legal frameworks that regulate global affairs. |
| Family and Succession Law | This course covers legal principles related to family relations, inheritance, and succession, focusing on the rights and obligations of family members under the law. |
| Criminal Law | This course examines the foundations of criminal law, including the classification of crimes, legal defenses, and the role of law |

| | |
|-----------------------|--|
| | enforcement and the judiciary in criminal justice. |
| Financial and Tax Law | This course explores the legal frameworks surrounding taxation, financial regulations, and the management of public and private financial resources. |
| Public Service | This course focuses on the legal aspects of public service, examining the rights, duties, and ethical considerations of public servants in their roles within government institutions. |

3rd Year Students (2nd Semester)

| Course | Description |
|---|--|
| Civil and Economic Procedural Law | This course examines procedural aspects of civil and economic disputes. It covers legal frameworks and judicial processes involved in resolving commercial and civil litigation cases. |
| Human Rights | Providing a comprehensive overview of international human rights law and its enforcement mechanisms, this course critically analyzes legal protections, challenges, and the evolving nature of human rights in the global context. |
| Private International Law | This course explores rules and principles governing cross-border legal disputes and conflicts of law. It focuses on resolving jurisdictional issues and harmonizing legal systems in a globalized world. |
| Civil and Commercial Law of Foreign Countries | This course explores the civil and commercial legal systems of various countries, focusing on key differences in contracts, trade regulations, and dispute resolution methods. |
| Intellectual Property Rights | This course covers the legal protection of intellectual property, including patents, trademarks, copyrights, and trade secrets, with an emphasis on international standards and enforcement. |
| International Organizations Law | This course examines the legal framework governing international organizations, their roles, functions, and the regulation of their activities in global governance. |
| World Trade Organization Law | This course focuses on the legal aspects of the World Trade Organization, including trade agreements, dispute resolution mechanisms, and the regulation of international trade. |

4th Year Students (1st Semester)

| Course | Description |
|------------------------------------|---|
| International Commercial Law | Focusing on legal principles governing international commerce and trade, this course provides a comprehensive overview of commercial transactions, contracts, and dispute resolution in a global context. |
| International Law of Treaties | This course examines the formation, interpretation, and enforcement of international treaties. It aims to develop students' understanding of legal frameworks that govern international agreements. |
| Diplomatic and Consular Law | Exploring legal aspects of diplomacy and consular affairs, this course focuses on rights, privileges, and responsibilities of diplomatic agents and mechanisms of international diplomatic law. |
| Methodology of Scientific Research | Introducing students to research methodologies and academic writing in international law, this course emphasizes development of critical thinking and research skills essential for scholarly inquiry. |
| International Investment Law | This course examines the legal principles governing cross-border investments, focusing on international treaties, dispute resolution, and protection of foreign investments. |
| Women's Rights | This course explores the legal frameworks and international conventions dedicated to protecting and promoting women's rights, focusing on gender equality, empowerment, and combating discrimination. |
| International Humanitarian Law | This course covers the rules and principles of international law that govern the conduct of armed conflict, the protection of civilians, and the treatment of prisoners of war. |
| International Transport Law | This course focuses on the legal regulation of international transportation, including maritime, air, and land transport, and the relevant conventions governing safety, liability, and trade. |
| EU Law | This course covers the legal structure and operation of the European Union, examining its institutions, legal principles, and the relationship between EU law and member states' national laws. |

| | |
|--------------------------|---|
| Notariat | This course explores the role of notaries in legal transactions, focusing on the certification of documents, property deeds, and contractual agreements. |
| Prosecutor's Supervision | This course examines the legal framework for prosecutorial supervision, focusing on the prosecutor's role in criminal justice systems and the oversight of legal proceedings. |

UWED International Economics and Management Courses

2nd Year, 2nd Semester

| Course | Description |
|----------------------------|---|
| Principles of Management | This course introduces students to fundamental management theories and practices, covering planning, organizing, leading, and controlling within organizations. Emphasis is placed on developing managerial skills applicable across various business contexts. |
| Macroeconomics 2 | Building upon introductory macroeconomics, this course delves deeper into economic indicators, fiscal and monetary policies, and global economic interactions. Students analyze economic models to understand national and international economic issues. |
| Probability and Statistics | This course covers essential concepts in probability and statistical analysis, providing tools for data interpretation and decision-making under uncertainty. Applications in economics and business are highlighted to enhance analytical proficiency. |

3rd Year, 1st Semester

| Course | Description |
|------------------------------------|---|
| Principles of Financial Accounting | Students learn the fundamentals of financial accounting, including the preparation and analysis of financial statements. The course emphasizes the role of accounting information in business decision-making. |
| World economy | This course examines the structure and functioning of the global economy, focusing on international trade, finance, and economic development. It explores the roles of major international economic institutions and policies. |
| International Management | Focusing on managing businesses in a global context, this course addresses cross-cultural challenges, international strategies, and global market dynamics. Students develop skills to effectively manage and lead in diverse international environments. |
| Project Management | This course teaches the principles and practices of managing projects, focusing on planning, execution, and monitoring to achieve project goals within constraints like time and budget. |

| | |
|---|--|
| Development Economics | This course explores the economic aspects of development, examining policies and strategies aimed at improving living standards, reducing poverty, and promoting sustainable growth in developing countries. |
| Marketing | This course covers the fundamentals of marketing, focusing on consumer behavior, market research, branding, and strategies for promoting products and services in competitive markets. |
| Green Economy | This course examines the concept of a green economy, focusing on sustainable development practices, renewable energy, environmental protection, and the economic transition to eco-friendly industries. |
| Introduction to Sustainability Sciences | This course introduces the principles of sustainability, focusing on environmental, social, and economic aspects for achieving long-term global and local sustainability. |

3rd Year, 2nd Semester

| Course | Description |
|--|---|
| International Marketing | This course explores marketing principles and strategies in the international arena, including market entry, global branding, and cross-cultural consumer behavior. Students learn to develop marketing plans tailored to diverse global markets. |
| Econometrics | Students are introduced to statistical methods applied to economic data, focusing on regression analysis and model building. The course emphasizes empirical research skills for analyzing economic relationships. |
| International Economics | This course analyzes economic interactions between countries, covering topics such as trade theories, policies, and the balance of payments. It provides insights into the economic forces shaping globalization. |
| Development Financing Institutions | This course examines institutions that provide funding for economic development, focusing on their role in supporting projects and policies in developing countries. |
| International Investment Activities | This course explores the strategies and legal frameworks governing international investments, including market analysis, risk management, and cross-border transactions. |
| National Economy of the Republic of Uzbekistan | This course focuses on the structure and key sectors of Uzbekistan's economy, analyzing its development, policies, and integration into the global economy. |

| | |
|----------------------|--|
| Banking | This course covers the fundamentals of banking systems, including financial intermediation, risk management, and the regulatory environment in the banking industry. |
| Financial Management | This course teaches principles of managing financial resources in organizations, focusing on budgeting, financial analysis, and decision-making to optimize financial performance. |

4th Year Students (1st Semester)

| Course | Description |
|--------------------------------------|---|
| International Economics | An advanced exploration of international economic issues, this course covers complex topics such as exchange rates, international monetary systems, and economic integration. Students engage in critical analysis of current global economic challenges. |
| Big Data Analysis in Economics | This course focuses on using big data techniques to analyze economic trends, predict market behavior, and inform policy decisions. |
| International Political Economy | This course examines the relationship between politics and economics on a global scale, focusing on how political decisions affect international trade, finance, and development. |
| World Trade Organization Law | This course covers the legal framework of the World Trade Organization, including trade agreements, dispute resolution, and the regulation of international commerce. |
| International Financial Technologies | This course explores the role of technology in transforming global financial markets, focusing on fintech innovations like blockchain, digital currencies, and online payment systems. |
| International finance | This course looks at the financial systems and markets that operate globally, focusing on investment strategies, exchange rates, and the flow of capital between nations. |
| International business | This course looks at the financial systems and markets that operate globally, focusing on investment strategies, exchange rates, and the flow of capital between nations. |
| Economic Diplomacy | This course examines how economic tools and strategies are used in diplomatic relations to influence trade, investment, and international economic policies. |

| | |
|-------------------------------------|---|
| International Economic Negotiations | This course covers the strategies and techniques used in negotiating international economic agreements, focusing on trade, investment, and development. |
| Development Economics | This course explores the economic challenges faced by developing countries and the policies aimed at promoting sustainable economic growth and poverty reduction. |
| International Logistics | This course examines the movement of goods and services across borders, focusing on supply chain management, transportation, and the global logistics network. |

Courses offered by UWED (graduate level)

UWED Political Science Courses

1st Year, 1st Semester

| Course Name | Description |
|---|--|
| Research Methodology | Introduces qualitative and quantitative research techniques in political science, including data collection, analysis, and academic writing. |
| Political Behaviour | Examines individual and group political actions, voting patterns, political culture, and public opinion. |
| Political Analysis and its Theoretical and Methodological Foundations | Explores key theoretical perspectives and methodological tools used in analyzing political systems, policies, and power dynamics. |
| Media Politics and Public Relations | Analyzes the role of media in shaping political agendas, public opinion, and strategic communication in governance. |
| Islamic Factor in International Relations | Studies the influence of Islam and Islamic movements on global politics and diplomatic relations, particularly in the Muslim world. |
